

Cloud Hosted VoIP

Information About the Service

This is an IP based voice telephony service that is supplied over a fixed broadband internet service and a wired ethernet port that can be used to make national and international calls. Cloud Hosted VoIP provides the customer with a PBX hosted by Connected 360 that utilises a Voice over IP (VoIP) connection to make and receive phone calls. Minimum contract term is 1 month.

The monthly plan fees include one new geographic phone number, all calls to local/national/Australian mobile numbers (excluding 1 month contract plans), programming of all standard features of a hosted PBX and one hunt group.

Bundling Arrangements

This service is not conditional on any bundling arrangements, however Connected 360 do provide other telco services that can be included on one bill. It is recommended that it be used in conjunction with a dedicated Connected 360 broadband service.

Mandatory Components and Conditions

It is recommended that handsets are supplied by Connected 360 and purchased outright.

It is recommended the internet service be supplied by Connected 360. Each handset extension requires a minimum bandwidth of 100kbps of uncongested upstream and downstream for optimal quality. Call quality may be affected by the internet connection, firewall, hardware, or other matters outside the control of Connected 360.

If the Service is unavailable due to any reason such as a power outage, it will prevent successful connection to the 000 emergency services. For this reason, Connected 360 recommends that the Customer has an alternative method of making calls, such as a mobile telephone.

Information About Pricing

Min Monthly charge	\$44
Total minimum price	\$44
Call charges by Type	Price
Local and National	Unlimited
